

# Nursing Mother's Policy

Nursing Mothers are asked to inform the teachers of their intention to nurse their child each day, with an approximate time they expect to be in the center.

Please confirm with the Director or Assistant Director that an employee is available to bring the child to the Dutch door before coming to the center.

Before using the front door's touch pad, please sanitize your hands and discard any masks and gloves that have been worn outside the center.

The teacher will sign your child in and out on their tablet; the parent tablet will remain turned off.

Before entering the Nursing Mother's room, please sanitize your hands.

Please don't leave any milk, bottles, or pump parts in the nursing room. It is for nursing only.

Please spray the chair and door handles with Lysol spray before leaving the room.

Please leave the door to the room open when you leave.

Please sign below to acknowledge that you have read and will abide by the policies and procedures outlined in this policy when using the nursing mother's room.
